

Note from Ms. LeBlanc

It was a good productive week looking back at the week of August 19th. We are learning about each other and making friends. We have been learning procedures, rules and making good choices. Saxon math lessons and homework have begun (students were actually excited to have homework). Math sheets have a frontside that we do in class and a backside which is for homework practice. This will be a routine for Monday through Thursday unless there is an assessment.

In Superkids reading and phonics we have been doing a review unit. This will continue for the next two weeks. After the review unit, there will be an assessment of phonemic awareness, decoding, fluency, reading comprehension and writing skills. During our cozy corner read aloud, the students were impacted by a story we read about Helen Keller.

In Social Studies we are learning about being a good citizen and following rules. We will be coving community helpers. In science, our focus has been learning about scientists and how they study our world. We will be discovering the best way to preserve and mummify an apple as an experiment. We had a wonderful learning experience using our sense of touch to guess what items were in a bag. We also used our sense of smell to guess what scent is on the cotton balls that I prepared. We are looking forward to learning about life cycles.

In Christian learning we have been reading about Cain and Abel, The Great Food, and God's Promise to Abraham. Next week we will be reading about Abraham and Sarah's miracle son and Isaac blessing his sons. The students are learning songs with hand motions and participating in character development group games and discussions.

I am truly enjoying working with each and every one of your precious students.

Please make sure your student has a large pencil box to hold colors, markers and color pencils.

BELIEVE. BELONG. BECOME

Thank You for choosing Us!
